

# Kaivogen Products/Price List 2021

High quality laboratory reagents and microplates

Prices are valid until the end of February 2022

# Streptavidin plates off-the-shelf (2021)

*KaiSA96* is our flag-ship product for ELISA assays and widely used by several diagnostic companies. Plates are available off-the-shelf as *Lockwell (C8*, breakable to single well use) and *C12*. Other plate types are available on request.

For sensitive competitive assays we recommend *UniverSA96* plates, currently available as Lockwell (C8).

Streptavidin in KaiSA96 and UniverSA96 plates is cross-linked to minimize leaching. More information from [www.kaivogen.com](http://www.kaivogen.com) or [info@kaivogen.com](mailto:info@kaivogen.com).

Product model	Product number	Order size 1-49 plates	Order size 50-499 plates	Order size >500 plates
KaiSA96-Lockwell (C8)*	41-01	22.30 €	21.40 €	18.80 €
KaiSA96-C12*	41-04	21.40 €	20.00 €	18.30 €
UniverSA96-Lockwell (C8)*	41-18	33.50 €	32.00 €	29.50 €

\* production ISO9001/ISO13485 certified

VAT not included

For orders below 300 EUR we add a handling fee of 35 EUR

Prices are valid until the end of February 2022

# Streptavidin plates available on request

The plates listed here are manufactured regularly but are not always available off-the-shelf. **SA96** is a passively coated streptavidin plate. **KaiSA96-C12 LOW** is a low background plate for time-resolved fluorometry-based assays. **KaiSA384** plates are suitable for HTS applications. In addition, several other plate types are available as custom orders.

Product model	Product number	Order size 1-49 plates	Order size 50-499 plates	Order size >500 plates
SA96-C12 LOW	41-07	21.40 €	20.00 €	18.30 €
KaiSA96-C12 LOW*	41-03	21.40 €	20.00 €	18.30 €
Custom coated KaiSA384	43-16	Please ask for quotation		
Other plate types	Please ask for quotation			

\* production ISO9001/ISO13485 certified  
VAT not included  
For orders below 300 EUR we add a handling fee of 35 EUR  
Prices are valid until the end of February 2022

# Anti-species plates

Our anti-species plates are typically used by antibody manufacturers for screening of hybridoma cell lines. *Anti-mouse* plates recognize all immunoglobulin subtypes and are available off-the-shelf. *Anti-human IgG, anti-rabbit IgG, anti-sheep IgG and anti-human IgM* are currently available as test plates.

Product model	Product number	Order size 1-49 plates	Order size 50-499 plates	Order size >500 plates
Anti-mouse-C12	41-09	34.90 €	32.10 €	29.50 €
Anti-human IgG-C12	41-26	68.50 €	57.90 €	42.10 €
Other plate types and anti-species				Please ask for quotation

\* production ISO9001/ISO13485 certified  
VAT not included  
For orders below 300 EUR we add a handling fee of 35 EUR  
Prices are valid until the end of February 2022

# Upcon<sup>®</sup>

Upcon<sup>®</sup> is our new detection technology based on upconverting nanoparticles with several particle types available for different applications. Particles are available also as ready-to-use protein conjugates.

More information available from [www.upcon.fi](http://www.upcon.fi) or [info@kaivogen.com](mailto:info@kaivogen.com).

<b>Product</b>	<b>Product number</b>	<b>Price</b>	<b>Unit size</b>
Upcon 540-C1-COOH*	46-02	418 €	5mg
Upcon 540-C1-SA*	46-03	418 €	1mg
Upcon Stabilizer 50x concentrate	46-19	52 €	3x20ml
Upcon LF Buffer and Upcon Assay Buffer		Please ask for quotation	
Several other particle types (size, functional group, etc.)		Please ask for quotation	
Conjugation service		Please ask for quotation	
Evaluation of Upcon particles in your assay		Please ask for quotation	

\* production ISO9001/ISO13485 certified

VAT not included

For orders below 300 EUR we add a handling fee of 35 EUR

Prices are valid until the end of February 2022

# Laboratory buffers

We offer different laboratory buffers to be used with your immunoassays. Our catalogue items include clear and colored assay buffers and a wash concentrate to be used with plate washers. In addition, we provide a Europium Fluorescence Intensifier solution for assays using lanthanide chelates that require a separate intensification step at the end of the assay.

Product model	Product number	Bottle size	Price per bottle
Wash Concentrate 25x	42-01	500mL	23.40 €
Buffer Solution RED	42-02	500mL	45.00 €
Buffer Solution COLOURLESS		Please ask for quotation	
Europium Fluorescence Intensifier, EFI*	42-04	200mL	71.00 € (≥10 bottles 66.00 €)

\* production ISO9001/ISO13485 certified

VAT not included

For orders below 300 EUR we add a handling fee of 35 EUR

Prices are valid until the end of February 2022

Kaivogen offers also a wide variety of custom services, including assay development, plate coating, custom buffer and other liquid manufacturing, protein labeling etc. Services are available as ISO9001/ISO13485 certified upon request.
